

# User Stories Worksheet

## What are they?

- A high-level definition of a requirement containing enough information for the developers to produce a product
- A reminder to have a conversation
- Provide a understanding of the overall product

## How do I write them?

- Basic construction: As a WHO I want WHAT so that WHY.
- Keep high-level description, don't get technical. Never worry about the technical details, user stories are about what is needed in the user role, not how it will be done
- Keep a user story short, 1 sentence
- Be clear and avoid using phrases "maybe", "something like", "I don't know", "if this is possible"
- Avoid functional requirements, i.e. "click a button to bring up a window"
- Avoid conjunctions AND/OR, should become multiple user stories
- Give priority: Must have, Should have, Could have, Won't have this time/Nice to have (MoSCoW)
